

## THEJUS ENGINEERING COLLEGE

Anti sexual harassment cell of Thejus Engineering College was constituted on 08-03-2021 for developing guidelines and norms for policies against sexual harassment and to organize gender sensitization awareness program. The committee constitutes an in-charge and four other members. We have conducted a meeting to discuss about the details of the programs to be conducted and prepared a detailed plan of actions, both short and long term. Minutes of the meetings were recorded. We have planned to conduct a seminar for the students at the meeting. But unfortunately, due to the pandemic situation we were unable to find the best personalities for the talk.

### Future plans:-

Events like painting competition, collage competition, etc are planned and will be executed with themes related to sexual violence against women and their prevention.

Programs such as guest lectures by eminent resource persons, panel discussions, workshops, video sharing etc to create awareness about issues relevant to sexual harassment, gender equality, violence on women, menstrual hygiene etc.

Creating awareness among the stakeholders of the institution about the existence and operations of the committee by using posters on the campus premises.
